

FABRIC & COLOURS

We partner with our supplier to provide the widest range of high-quality fabrics. The canvas is coated with both a water-repellent coating and an antifungal coating. This means that in heavy rainfall, the material will not wither and lose its stability. Additionally, the colour will not fade from the sun. No matter what the weather conditions are, the canvas material of the umbrella will stand the test of time. The collection is available in all our fabric colours and patterns.
